Workforce Readiness and Career Technical Education Diploma

The Board may award a Workforce Readiness and Career Technical Education Diploma to every student who successfully completes all minimum graduation requirements as well as the following:

1. Successfully passed a technical skills assessment;
2. Successfully passed the workplace readiness assessment; and
3. Demonstrated competency in career technical education program standards as identified with “Skillstack” or a successor program and earned the workforce readiness badge or an industry certification approved by the Division of Career Technical Education for this purpose.

To receive this specialty diploma, students are not required to complete more than the total credits required to graduate. A student may earn their last year of Math and English credits through a practical math or technical writing course.

Each student is encouraged to earn a relevant industry certification.
